Books by Outpost Wargame Services

All of our books are designed to give the wargamer as much information as possible about the conflict covered. In particular, each of the books allow the wargamer the opportunity to paint their figures using a single reference source. Until the advent of modern warfare, troops were distinguished by the colour and style of the jackets or coats that they wore. To make the painters life that much easier, each book (with the exceptions of UG7 and 8) contains full colour schematics of each regiments jacket or coats.

- UG 1 Mexican / American War 1846-48** **£10.99**
Background to the Conflict
Army Organisation
Uniform Guides to both the Mexican and American Armies
- UG 2 Spanish Napoleonic Army pre 1808** **£10.99**
Background
Official Troop organisation
Example of actual Army Division
Uniform Guide
- UG 3 French and Indian Wars 1754 - 1763** **£10.99**
History of the Conflict
Troop Establishments
Selected Orders of Battle
Uniform Guide for all the protagonists
- UG 4 Franco-Prussian War 1870-1871 Vol I - Imperial French** **£10.99**
UG 5 Franco-Prussian War 1870-1871 Vol II - North German Confederation **£10.99**
UG 6 Franco-Prussian War 1870-1871 Vol III - South German Federation / French Republican Army **£10.99**
All three of the above contain at least the following sections,
History, Troop Establishments, Selected Orders of Battle and a full Uniform Guide.
Combined together, they give a full account and reference guide to the conflict and are an ideal compliment to our range of 15mm figures for the period.
Purchase all 3 together at a discounted price of £30.00
- UG7 'Glutter of Ravens' - Warfare in the age of Arthur** **£10.99**
Rules and Resouces for Wargames in the Period AD400-AD700
Designed, written and researched by Dan Mersey, an Archeologist and Wargamer with a keen interest in the period (and it shows!)

Part 1 : A set of 'fast play' rules for the period allowing for a free flowing game where the rules don't get in the way of the wargamers tactical abilities.
Part 2 : Resources for the Period including colour plates of examples of the clothing / armour worn and shield designs.
An ideal compliment to our 15mm 'Dark Age' range of figures.
- UG8 'Armies of Medieval Burma AD700-1300'** **£10.99**
Another companion for our figure ranges, this book is a must for anyone who likes armies with Elephants!
It has too many sections to mention here but includes Army composition, Tactics, Troop types, and the obligatory colour plates. Written by Dan Mersey of 'Glutter of Ravens' fame.
- SL1 Shattered Lances : Wargaming in the age of the Crusades 600 - 1400 AD** **£10.99**
Author : Dr. Brendan Moyle (£10 if bought with £20+ figs)

Although this is primarily a set of wargame rules for the period, it is interspersed with fascinating 'titbits' of information from the period. B/W photographs of figures and diagrams are used to illustrate points and tactical details.
The rules have been comprehensively researched and playtested over a long period and are backed by an active news group on the internet, to visit and ask a question or two of the Author or 300+ members if you wish(see website for link). These period specific rules offer a far more comprehensive flavour of the conflicts, the actual tactics and unique manouevs that made it 'special', than any generic rule system could hope to match.
Achieving this without detracting from the playability or 'fun' of the game is a real tribute to the author. Please note though that they are NOT a 'five minutes and out with the dice' ruleset. The rules themselves run to 48 pages or so, with army lists from the First Crusade and references taking it to a cool 60 pages in total.
The main principles can be learnt pretty quickly however and after a few games, you will only need the supplied 'quick reference' sheet for much of any game, using the main book for special reference where necessary.
